🪪 PROFILE

Hi, I am a full stack web developer with focus on backend development. My passion is building beautiful websites with great interfaces and features. I am currently knowledgeable in MERN stack, and currently learning other MERN technologies. I am hoping to learn other webdev stacks and continue competitive programming in the future.

🧠 SKILLS

- Node.js
- Express.js
- MongoDB
- React.js
- TypeScript

Maharaja Surajmal Institute of Technology - 8.3 CGPA
B.Tech Information Technology
09/2023 – present
Delhi, India

Aadharshila Vidyapeeth - 83%
CBSE Board
03/2021 – 03/2023
Delhi, India

🗂 PROJECTS

KinoFlow 🔗
Kinoflow is an all-in-one platform designed to simplify how you track, discover, and share movies. Whether you're a casual viewer or a cinephile, it helps manage your movie library, find personalized recommendations, browse new releases, and share reviews effortlessly.
--> *Node.js, Express.js, MongoDB, Embedded JavaScript, BootStrap*

Portfolio Website 🔗
This is my personal portfolio with a minimalist retro design, consisting of bio, details, tech stack, projects, interests and contact information.
--> *HTML5, CSS3, JavaScript, BootStrap, MDB*

AI Chatbot
This is a full functional AI chatbot application built using MERN stack and OpenAI API. It's a completely secure application with password encryption and JWT Tokens. (currently in development)
--> *MongoDB, Express.js, React.js, Node.js, TypeScript, BootStrap, OpenAI*
